THE TOOLES

of Garry - nee - Dule

BARABOO, WISCONSIN

Greetings to our Friends--

Because of the many demands caused by the war we have further curtailed our production of ornamental plants, but have kept up our selection of herbs and many of the wild flowers.

The herb plants and seeds provide an important addition to the Victory Garden so that we may have a wider variety of flavors in our diet.

Monotony will be inevitable in the rationed days ahead unless we use ingenuity in varying our limited resources. This is especially true of the food which must provide us with the necessary strength to "carry on;" and must be appetizing and satisfying as well.

In this herbs will prove invaluable; the ease with which they vary the daily diet, add to the palatability, and glamorize the commonplace, as well as provide many nutritional benefits, makes them a desirable addition to our ration list.

SIXTY YEARS AGO

Sixty years ago the late William Toole, Sr., sent out his first price list of seeds and plants. It was also the birth year of W. A. Toole. There has been many changes in the character of the business but we are still growing seeds and plants.

Should you be in this part of the country at any time we will be very pleased to have you call at Garry-nee-Dule.

WHAT DOES GARRY-NEE-DULE MEAN?

Many of our friends ask us the meaning of "Garry-nee-Dule," the name of our home and Nursery. It is the phonetic spelling of "Garrda-ni-Tuathail," ancient Gaelic or Irish meaning Garden of the Toolies.

DELIVERY CHARGES PREPAID

Please note that our prices on all retail orders except trees and shrubs include prepayment of delivery charges, if your order amounts to \$1.00 or more. On orders of less than \$1.00, 10c should be included for parcel post.

Where prices are given for plants by three or by the dozen, these prices apply only where that amount of **one variety** is ordered.

We sincerely try to grow and pack our products to reach you in the best possible condition. Should we fail to do this, as sometimes happens, please let us know at once and we will try to make adjustments that are satisfactory to you. We guarantee our products to reach you in good condition. Any plants proving to be not true to name will be replaced if you will notify us within reasonable time.

Growing Herbs

With restraints put on our travels by the necessities of war we will have more time for gardening this year. Or at least we will, many of us, turn to gardening as a relief to our spirits and an outlet for our griefs.

The herb garden adds to the enjoyment and savoriness of our meals which will add to our good health and spirits.

Other herbs add, by their fragrance or legends or medicinal value, to our enjoyment of the garden.

Growing in friendliness with the human race, herbs became an essential to every home, whether cottage or castle, up to recent times. In the rapid expansion of this country, some of their virtues were overlooked for a time. Their revival is not a fad but a natural outgrowth of our need for the natural things of life.

Herbs present no special cultural problems. Excessive fertility is not necessary for most kinds, and a well drained good garden soil is ideal. The mint family seems to do well in a soil that is constantly moist. Chervil requires moderate shade to do well.

Herb Seed List will be found at the end of the herb plant portion of the catalog.

Please Note. The lower prices on 3 and 12 plants only apply where 3 or 12 of ONE VARIETY are ordered.

HERB SEEDS

Sow seeds of the annual herbs out of doors at early corn planting time in your locality, or when the maples start to leaf out. The perennial herbs should be sown early in the spring for best results though they may be sown later or even in early fall in many sections.

Annuals are designated by an "A" after the name while Perennials are followed by the letter "P". For descriptions, see plant list.

Herb Magic

Extreme care has been used in the preparation of these herbs to insure you a product that is clean and full of flavor or fragrance. All the culinary herbs have been carefully gathered, inspected, and sorted and washed; then placed in screen bottomed trays and dried under cover so as to preserve every possible bit of the fresh natural fragrance and flavor. After another inspection they are stored in air-tight containers until packaged.

These flavorful herbs are granulated, ready to use. A folder, prepared by Mrs. Toole, gives many suggestions for the use of these herbs, enclosed with each order, on request. It will just fit your card index recipe file.

It is not possible to give exact amounts to be used of the different herbs due to varying tastes. In a general way, start with a level teaspoonful for six portions and increase or lessen the amount according to taste, or in recipes use one scant teaspoon of dried herbs where a tablespoon of green herbs is called for.

Because many people who have previously bought our herbs now have the glass jars for storage, we are now offering refill packages of $\frac{1}{2}$ and 1 oz. size at a lower price for those who want them.

PREPARED CULINARY HERBS

Basil — Has a spicy flavor, which is very desirable; for salads and dishes containing tomato and cheese, eggplant, squash, carrots, peas, meats; and especially for meat substitutes, including beans and fish. (**Not available until August 1st.**)

Bay Leaves — The popular flavoring medium included in countless recipes.

Celery — A convenient way of adding this well-known flavouring to soups and many other dishes. Celery is rich in magnesium, iron, potash, lime, sulphur and chlorine.

Chives — Retains the Chives flavor very well, and is a most convenient way to add the delicate onion flavor to all sorts of dishes.

Chervil — Resembles a mild flavored Parsley with a subtle aromatic quality. $\frac{1}{2}$ oz. jar 35c; 1 oz. jar, 65c; Refills, 30c and 60c each. (**Not available until August 1st.**)

Fennel — An anise-like flavor, delicate in quality. Used in soups, beverages, salads and desserts. Especially associated with fish cookery. It is said Fennel is to fish what Mint is to lamb.

Garlic, Powdered — Dried, powdered garlic offers a convenient way to use this flavorful herb.

Lovage — A rich celery-like flavor, with a lingering nutty after flavor. Used in countless ways—delightful in soups, sauces, salads, stews; and combines well with other herbs.

Marjoram — Sweet Marjoram is a well known old herb of many uses. It has a very pleasant rich flavor that may be used alone or combined with other herbs in soup, stews, sausages; added to dressings for fowl and fish, and to soup; —in fact used in almost endless ways.

Mint — The cool, fresh flavor of Mint, or, as it is also known, Spearmint and Lambmint,—has many uses such as flavoring for cooling drinks, sauce for lamb or mutton, to flavor beets, peas, carrots and many others. Used sparingly in fruit salad, combining particularly well with bananas, pineapples, or oranges.

Applemint—A variation of mint which may be used in the same ways as ordinary mint.

Pineapple Mint — Another variation of mint with a subtle flavor.

Orange Mint — A variation especially delightful when blended with applemint.

Round Leaved Mint — A delightfully more delicate flavored mint.

Oregano — This is a marjoram much used in Greece, Italy and in Mexico. The flavor is strong but much like Sweet Marjoram. It is used generally where Marjoram is used, especially in meat stews, gravies and sauces.

Parsley — Except for garnishing, our dried and flaked Parsley may be most conveniently used for any purpose that fresh parsley is used. Parsley is rich in iron and mineral salts.

Rosemary — Added sparingly, it gives a distinctive flavor to preserves, jams, sweet pickles, meat sauces, stews, poultry, cream soups and fish. Combines well with sage in stuffings for pork and veal.

Sage — A strongly flavored old-time favorite, used in pork sausage, poultry seasoning, and many other ways.

Savory (Bohnenkraut) — Much used as a flavoring for beans, and in salads, vegetables, stews and other dishes. A pot of savoury baked beans will extend the meat ration delightfully.

Sorrel — French Sorrel, with the well-known sorrel flavor, especially desirable in soups, stews and sauces.

Tarragon — A well known delicate flavoring medium, used in many dishes such as salads, sauces for fish, egg dishes, poultry and many others. $\frac{1}{2}$ oz. jar 35c; 1 oz. jar 65c; Refills 30c and 60c each. (Available after June 15th).

Thyme — May be used alone or combined with other herbs, in an almost endless variety of ways. Used with various meats, poultry, fish, cheese, eggs, soups, vegetables, stuffings and salads.

Lemon Thyme — A thyme with a fresh flavor of lemon. Gives a different flavor to salad, to cooling drinks, and to sauces for fish.

HERB BLENDS FOR SPECIAL PURPOSES

These combinations have been carefully compounded by Mrs. Toole, after testing many old recipes. We believe you will like them.

Poultry Seasoning — A blend of savory herbs to flavor stuffing of all kinds of poultry or game birds and fried chicken. Mix the herbs with the flour or batter in which the chicken is dipped when sauted. Customers tell us it is equally as good on other meat dishes.

Fish Herbs — This combination of nine herbs adds a delightful savor to any fish dish without obscuring the fish flavor. Mix in a sauce or add to a stuffing. Also mix with flour or other medium in which fish is dipped when sauted.

Savory Meat Herbs — Try this combination of nine herbs that harmonize so delightfully with soups of meat stocks, consomme, roasts, meat loaves and all types of meat dishes. The herbs are either sprinkled over, rubbed or mixed into the meats. (Try any of the above blends with liver, tongue or heart).

Omelet Herbs — Adds zest to omelet or any egg dish. Mix the herbs with eggs before cooking, or sprinkle over omelet before folding. Delightful flavor, too, in creamed chicken or soups.

Salad Herbs — A combination of ten herbs for seasoning salad dressings or to sprinkle on leafy salads and various salad mixtures. This is very popular. Gives a tantalizing flavor to either vegetable or fruit salads. Add to the dressing an hour or two before serving to get the full flavor of the blend.

Tomato Herbs — A special combination that goes with any tomato dish, a soup, stewed or baked tomatoes, tomato juice cocktail and tomato aspic.

Most of these will make good iced tea also. Besides being a good beverage, most of them are mildly soothing to the spirit;—and who does not need a bit of that in this trouble-torn world?

Herb Teas in general are made by pouring boiling water over the herb, (about one teaspoonful to each cup of water), allow to steep about ten minutes, strain. Serve plain or with lemon or honey. Milk and cream usually are taboo. A porcelain container, and not metal, is used as in making other teas.

SIMPLES or MEDICINAL HERBS

We have carefully prepared the following special "herbs for use and physic, not a few." These as well as many of the culinary herbs were used as home remedies in pioneer times; and most of them still are recognized as standard remedies.

The constant demands on our strength and endurance, and the scarcity of doctors and nurses, make it of increasing importance that we keep ourselves free from the minor illnesses which so often grow to major proportions. What more natural than we go back to the old-time tried and true remedies of our forefathers—the basis of all our modern medical lore. A few of these follow:

Catnip — Hot catnip tea is a stimulant and strengthens the kidneys as well as the whole system. The tea also breaks up a cold. A little milk is often added to this tea.

Celery — Celery tea, strong and hot, is of value in the cure of sciatica and neuralgia.

Elder Flowers — Useful in rheumatism, gout and colds.

Horehound — A good tonic. The tea, sweetened with honey, is useful in treatment of coughs and colds. Used also in the well known horehound candy.

Hyssop — An infusion of this is a remedy for coughs, colds and pulmonary complaints generally.

Rue — A bitter and aromatic stimulant very good for gas pains and colic.

Tansy — Tansy tea was an old remedy for nausea, colds and rheumatism.

Wormwood — A good remedy for weak digestion and consequent debility. Also a hot application of wormwood in vinegar and a bit of salt is a valuable remedy for sprains and bruises (with unbroken skin).

Yarrow — The infusion is used for colds and as a gargle for ordinary sore throat. It sometimes relieves simple intestinal cramps and pains, and the commencement of a fever.

Native Ferns

Do not plant ferns with much covering over the crowns, just enough to anchor them to the soil. The Ostrich Fern should be set with part of the crown above the soil. All of the ferns are adapted to both spring and fall planting, though late spring or summer planting of the larger varieties requires extra care in providing constant moisture until the roots are established. If planted in the fall, mulch with leaves or straw for protection over the first winter. If planted during the growing season and the tops become broken or bruised, cut them off and new fronds will soon appear.

Most all ferns require a plentiful supply of leaf mold, peat or other loose humus in the soil to give the best results. Ferns have a tendency to ripen off early in the season if the summer is very hot and dry. Frequent and plentiful watering will extend their season very materially.

In order to economize we have reduced the number of varieties of ferns and natives but we can supply most of the varieties that have appeared in recent lists, at the prices given in these lists.

Wild Flowers

Those who have once treasured and nursed a wild flower into bloom in their own garden or watched the tender new frond of a fern unfold its beauty under their own protection seem ever after more appreciative of plants in their wild haunts, and more anxious to conserve their beauty for all the world to enjoy.

Each year as people learn to know and love our own wild flowers, we see less wanton destruction of our native flora, and more desire to truly conserve our native landscape.
